

International Knowledge Exchange Visits for Nurses

Our nurses have participated in exchange and knowledge-sharing visits to Thailand, Israel, and Japan. The impact of these exchange programs is significant, as they facilitated the adoption of international best practices in disaster preparedness, pre hospital care and facility-based care, enhance the skills and competencies of our nursing staff and foster global collaboration and innovation in patient care.

By participating in these exchange programs, our nurses bring valuable insights and techniques that contribute to the continuous improvement of patient care in our facility.

Programs conducted in collaboration with: Khon Kaen Regional Hospital - WHO Collaborating Centre for Injury Prevention and Safety Promotion (Khon Kaen, Thailand), Osaka City University (Osaka, Japan) and MASHAV- Israel's Agency for International Development Cooperation & Ministry of Foreign Affairs, Jerusalem
